## 1. Description of the controls

Functions of the buttons

## 2. Connect and disconnect

### Connect

Switch off the lights for at least 10 seconds and switch them on again.  
Press the button **5. ON/Timer** 3 times (within 3 seconds). The light blinking 3 times signals that the connection has been successfully established.

### Disconnect

Switch off the lights for at least 10 seconds and switch them on again.  
Press the button **5. ON/Timer** 5 times (within 3 seconds). The light blinking 5 times signals that the connection has been successfully terminated. The connection can be established again, as described above.

## 3. Night light mode

To switch on the night light mode, please keep button **6. OFF/Night light** pressed for at least 2 seconds. The brightness level of the night light is 3% of the maximum brightness. To go back to the previous mode, please press any button.

## 4. Timer for switching off the lights

To switch on the timer-setting mode, please keep button **5. ON/Timer** pressed until the LEDs blink once. Within 3 seconds, select one of the buttons that determine the time setting of the timer. The LEDs blink 1 to 4 times (each light pulse indicates a time duration of 15 minutes).

Press		One light pulse indicates a time setting of 15 minutes
Press		Two light pulses indicate a time setting of 30 minutes
Press		Three light pulses indicate a time setting of 45 minutes
Press		Four light pulses indicate a time setting of 60 minutes
Press		Exit timer-setting mode

## 5. Saving the settings

The brightness and the colour temperature are saved after the remote control is turned off; you don't need to reset them when you turn it on again.
